Chart of Service Tax Provisions under Reverse Charge Mechanism

1. Point of taxation under reverse charge mechanism is date of payment to the service provider provided payment must happen within 6 months from the date of invoice otherwise point of taxation will be date of invoice. Invoice needs to be issued by the service provider within 30 days of completion of each event/service. If invoice is not issued within the specified time, point of taxation will be the date of completion of provision of service.

Provided that in case of "associated enterprises", where the person providing the service is located outside India, the point of taxation shall be the date of debit in the books of account of the person receiving the service or date of making the payment whichever is earlier.

For any service whose point of taxation has been determined and whole liability affixed before 1.7.2012/7.8.2012, the new provisions will not apply. Merely because payments are being made on or after 1.7.2012/7.8.2012 will not add any additional liability on the service receiver in respect of such services.

2. Service tax under reverse charge is applicable even if service provider is exempt from service tax up to the taxable value of 10 Lac. There is no threshold limit of exemption for the service receiver under reverse charge mechanism.

3. Input credit of service tax paid by recipient under reverse charge mechanism can be availed on the basis of tax payment challan. In case of Banks and NBFCs, Rule 6(3B) of CENVAT rules will also apply to input credit of service tax paid under reverse charge mechanism.

4. In the following cases, 100% service tax liability rests with the service provider only if service provider is a corporate entity:-

- i. Renting of motor vehicle
- ii. Manpower services & security Services
- iii. Works contract

In the above cases, service recipient will pay nothing under reverse charge mechanism.

5. It is the responsibility of service recipient to determine whether particular works contract covered under 11(a) to 11(c) is leviable to VAT or not. Service recipient is liable under reverse charge mechanism even if service provider does not charge VAT/WCT in invoice if VAT/WCT is otherwise applicable.

6. Provisions relating to works contract are applicable even if material is purchased from a separate person other than the person rendering services or under separate agreement or under separate invoice.

7. Valuation of Works Contract covered under 11(a) to 11(c) = Gross amount charged in invoice by service provider for labour and material used in execution of works contract (excluding taxes) plus fair market value of goods supplied by the service recipient used in execution of works contract (excluding taxes) less amount charged by service recipient from service provider in respect of goods supplied in relation to works contract.

If the service provider segregates the amount of labour and material in the invoice, service provider (non-company) will charge service tax @ 6.18% on labour amount in invoice and the same amount of

service tax calculated @ 6.18% on labour amount as mentioned in the invoice will be paid by service recipient under reverse charge mechanism to the Government directly. However, if the service provider is a company, it will charge service tax @ 12.36% on labour amount in invoice and service recipient will pay nothing under reverse charge mechanism to the Government. If segregation is not possible, service tax rate as per chart will be applicable.

Valuation of other Services = Gross amount charged in invoice by service provider in respect of services (excluding taxes)

	Chart
